Experience

Associate Backend Developer Apr 2026 – Sept 2026
Techolution *Hyderabad, India*

- Develop the execution engine for **Vonage Journey Architect**, translating journey DSL definitions through a step registry into durable **Temporal** workflows and workers for WhatsApp, SMS, RCS, and webhook channels.
- Build event-driven services in **Go** on **AWS** with **RabbitMQ**, implementing delay/wait workers, conditional branching, and external event triggers for long-running customer journeys.
- Implement execution analytics, node-level metrics, debug logging, and centralized secrets APIs to improve observability and operational support across distributed journey services.

Python Backend Engineer Intern Oct 2025 – Apr 2026
Techolution *Hyderabad, India*

- Engineered agentic AI and document workflows with **FastAPI**, including PDF conversion, Google Drive/GCS artifact retrieval, fuzzy search, versioned prompt management, and secure secret handling.
- Redesigned **MongoDB** schemas and aggregation pipelines, reducing query latency by **30%** across datasets containing more than **1 million records**.
- Built **AsyncIO**-based scheduling and Azure document-ingestion services processing **50,000+ documents monthly**; refactored backend services to support **5,000+ concurrent sessions**.
- Optimized LLM orchestration and system prompts, improving response reliability while reducing average token consumption per request by **15%**.

Software Developer Intern Mar 2024 – Dec 2024
Orchestration Syndicate *Remote*

- Built the **Climb** AI product demo, contributing to more than **$10,000 in project revenue** within six months, and co-developed a real-time pipeline using Apple's **4M multimodal model**.
- Implemented **OIDC** authentication and session-management improvements; introduced Pytest coverage and CI/CD workflows to strengthen release reliability.

Projects

MakeMeBetter AI | *Python, FastAPI, MongoDB, React Native/Expo, MCP, GCP* Product

- Built and shipped a Google Play goals, habits, and tasks product with an AI daily coach, subtasks, progress tracking, and free/pro plan entitlements.
- Developed an OAuth-protected **MCP server** exposing read/write tools to AI assistants; implemented subscription billing, usage metering, and a Google Cloud Run deployment.

PolicyChat AI | *Python, FastAPI, React, PostgreSQL, Gemini, Docker* GitHub

- Built a retrieval-grounded assistant for PDF, DOCX, and PPTX documents using Gemini, returning context-aware answers from uploaded content.
- Implemented multi-format ingestion, Supabase authentication, and persistent multi-session chat history; containerized services for GCP/AWS deployment.

Technical Skills

Languages: Python, Go, Java, TypeScript/JavaScript, SQL
Backend & AI: FastAPI, AsyncIO, Temporal, REST APIs, MCP, RAG, LangChain
Data & Systems: PostgreSQL, MongoDB, Redis, RabbitMQ, Distributed Systems, Microservices, Event-Driven Architecture, ETL/ELT
Cloud & Tools: AWS, GCP, Azure, Docker, Git, CI/CD, Pytest
Frontend: React, React Native/Expo, HTML/CSS

Education

Gokaraju Rangaraju Institute of Engineering and Technology Hyderabad, India
B.Tech. in Computer Science and Engineering | CGPA: 8.98/10 *2022 – 2026*
